

DEEPAK KUMAR

Software Developer | Backend Systems, AWS Infrastructure, APIs, and Production Delivery

Bangalore, India

cusat.deepak12@gmail.com | +91 95346 11809

linkedin.com/in/kumardeepakkg | github.com/deepakkkumar5396

CORE QUALIFICATIONS

- Backend-focused Software Developer and Tech Lead with hands-on ownership of production systems across eSports, FinTech, HealthTech, and Real Estate.
- Strong experience building REST APIs, microservices, real-time WebSocket services, event-driven workflows, payment integrations, and cloud-backed platforms.
- Production scale includes systems serving 1.5M+ users, 20K concurrent connections, 99.9% uptime, and payment flows with <1% failure rate.
- Practical AWS infrastructure experience across compute, containers, storage, networking, security, release workflows, monitoring, and deployment automation.
- Performance-focused engineer with experience reducing deployment time by 60%, Neo4j latency by 70%, service latency by 45%, and response time from 2s to 800ms.

PROFESSIONAL EXPERIENCE

Tech Lead | Techno XO Private Limited

Mar 2025 - Present | Bangalore, India | Node.js, MongoDB, MySQL, AWS, WebSockets

- Lead backend delivery for an eSports ecosystem and digital store for e& (Etisalat), supporting 1.5M+ users, 20K concurrent connections, and 99.9% uptime.
- Architect tournament hosting, real-time chat, top-up, gift card, reward commerce, and player-facing transaction services using Node.js, WebSockets, MongoDB, MySQL, and AWS.
- Integrated PayPal, PayTabs, PhonePe, and Cashfree payment flows and improved payment reliability to maintain <1% failure rate.
- Improved deployment automation and release workflows, reducing deployment time by 60% while supporting reliable production delivery.

SDE-1 | iBind Systems

Mar 2024 - Jan 2025 | Bangalore, India | Node.js, PostgreSQL, Neo4j, RabbitMQ, AWS

- Designed backend services and microservices for AML, KYC, authentication, document verification, and admin-led compliance workflows.
- Modeled complex corporate ownership structures in Neo4j for graph-based traversal, beneficial ownership analysis, and relationship-driven queries.
- Optimized Neo4j query patterns and traversal logic, reducing graph-query latency by 70% for compliance analysis workflows.
- Implemented RabbitMQ-powered background jobs, bulk processing workflows, and third-party integrations with Digilocker, SurePass, and Sandbox APIs.
- Secured access flows with JWT, OAuth 2.0, and Keycloak across compliance and admin systems.

Software Developer | Xanadu Reality

Jun 2022 - Feb 2024 | Bangalore, India | Node.js, React, PostgreSQL, MongoDB, PySpark

- Built scalable product platforms that transformed offline real-estate operations and contributed to Rs. 4500+ crore revenue influence.
- Delivered high-availability portals for sales, presales, and channel partners, reducing CRM operational costs by Rs. 10L/month.
- Developed API-driven CRM extensions, real-time cloud telephony synchronization, and business-critical workflows for sales operations.
- Processed and standardized 10GB+ datasets using PySpark and Azure Blob Storage to improve analytics readiness and data quality.
- Improved backend and data workflow performance, reducing latency by 45% and optimizing one response path from 2s to 800ms.

Associate Software Developer | MFine

Aug 2021 - May 2022 | Kochi, India | Node.js, React Native, Twilio, AWS S3

- Automated consultation recording workflows using Twilio Video Composition and AWS S3, enabling playback support for 6M+ mobile users.
- Improved large-dataset search and pagination performance through Elasticsearch-based query optimization.
- Built reusable React Native UI components and theming systems to improve consistency across the MFine mobile application.

TECHNICAL SKILLS

Languages: Node.js, TypeScript, JavaScript, Python, Java

Databases: PostgreSQL, MongoDB, Neo4j, Elasticsearch, Redis

AWS Services: EC2, ECS, EKS, Lambda, S3, CloudFront, ALB, API Gateway, EventBridge, IAM, VPC, RDS

Tools and Platforms: Docker, Kubernetes, Jenkins, Git, Terraform, Twilio, RabbitMQ, WebSockets, OAuth 2.0, Keycloak

EDUCATION

Master of Computer Application (MCA), Cochin University of Science and Technology | Jul 2018 - May 2021 | Kochi, India | CGPA: 7.2

KEY ACHIEVEMENTS

- Delivered eSports backend systems supporting 1.5M+ users, 20K concurrent connections, and 99.9% uptime.
- Improved payment reliability across PayPal, PayTabs, PhonePe, and Cashfree flows to keep transaction failure rate at <1%.
- Reduced deployment time by 60% through improved release automation and cloud deployment workflows.
- Reduced Neo4j graph-query latency by 70% for ownership traversal and compliance analysis.
- Processed 10GB+ datasets, improved latency by 45%, and optimized one response path from 2s to 800ms.
- Contributed to Rs. 4500+ crore revenue influence and Rs. 10L/month CRM cost reduction through real-estate product digitization.
- Automated consultation recording and playback workflows supporting 6M+ users in the MFine mobile ecosystem.
