PROFESSIONAL SUMMARY

- Tech Lead with 4.5+ years designing, building, and operating distributed backend systems with strong ownership across architecture, delivery, reliability, and production support.
- Expertise in microservices architecture, system design, REST APIs, real-time WebSocket services, event-driven workflows, payment integrations, and cloud-native platforms.
- Proven scale includes platforms serving 1.5M+ users, 20K peak active gamers, 99.9% uptime, and multi-gateway payment flows with strong reliability expectations.
- Hands-on AWS infrastructure ownership across ECS, EKS, Lambda, EventBridge, EC2, S3, CloudFront, ALB, API Gateway, VPC, IAM, RDS, CI/CD, and deployment automation.
- Performance-focused engineer with wins including 70% Neo4j query improvement, 60% Elasticsearch latency reduction, 45% API latency reduction, and 60% faster deployment cycles.
- Strong foundation in design patterns, scalability, operational excellence, mentoring, code quality, and full software development lifecycle best practices.

PROFESSIONAL EXPERIENCE

Tech Lead - Backend Systems | Techno XO Private Limited

Mar 2025 - Present | Bangalore, India | Node.js, MongoDB, MySQL, AWS ECS, Lambda, EventBridge, WebSockets, CI/CD

- Architected an end-to-end distributed eSports platform and digital store for e& (Etisalat), serving 1.5M+ users with 99.9% uptime and high-concurrency state management.
- Led system design and deployment of mission-critical microservices on AWS for tournament management, real-time communication, reward systems, payment processing, and commerce flows.
- Designed scalable real-time architecture using WebSockets to support low-latency player experiences and peak activity of 20K active gamers.
- Integrated PayPal, PayTabs, PhonePe, and Cashfree payment gateways across top-up, gift-card, and reward-led commerce workflows.
- Optimized cloud infrastructure to support 3x traffic growth while reducing deployment cycles from 45 minutes to 18 minutes through CI/CD automation.
- Mentored 5+ engineers on system design, code quality, production readiness, and operational excellence; awarded Star Performer 2025 for technical execution and leadership.

SDE-1, Compliance and Identity Platform | iBind Systems

Mar 2024 - Jan 2025 | Bangalore, India | Node.js, PostgreSQL, Neo4j, RabbitMQ, AWS, OAuth 2.0, Keycloak, JWT

- Designed backend microservices for AML/KYC compliance workflows handling corporate identity verification, document verification, and beneficial ownership analysis at enterprise scale.
- Architected Neo4j graph database models for complex organizational relationships and optimized query performance by 70% through traversal design and indexing improvements.
- Built robust asynchronous processing pipelines with RabbitMQ for high-volume document verification and guaranteed delivery semantics.
- Integrated Digilocker, SurePass, Sandbox, and compliance APIs while maintaining secure service boundaries and reliable failure handling.
- Implemented authentication and authorization with OAuth 2.0, Keycloak, and JWT across compliance and admin systems.

Software Engineer | Xanadu Reality

Jun 2022 - Feb 2024 | Bangalore, India | Node.js, React, PostgreSQL, MongoDB, PySpark, Azure Blob Storage

- Developed scalable backend platforms for real-estate digitization, supporting business units connected to Rs. 4500+ crore FY revenue impact.
- Engineered high-availability portals for sales, presales, and channel partner operations, reducing CRM operational costs by Rs. 10L/month through API-driven automation.
- Built API-driven CRM extensions, real-time cloud telephony synchronization, and business-critical workflows for sales operations.
- Optimized database and API performance through indexing, caching, and query improvements, reducing latency by 45% and improving throughput.
- Processed and standardized 10GB+ datasets using PySpark and Azure Blob Storage, improving data quality, analytics readiness, and business intelligence workflows.

Associate Software Developer | MFine

Aug 2021 - May 2022 | Kochi, India | Node.js, React Native, Twilio, AWS S3

- Automated consultation recording, processing, and playback workflows for 6M+ mobile users using Twilio Video Composition and AWS S3.
- Optimized search infrastructure using Elasticsearch, achieving 60% latency reduction and efficient pagination for large-scale datasets.
- Built reusable React Native UI components and theming systems to improve consistency across the MFine mobile application.

TECHNICAL SKILLS

Languages and Frameworks: Node.js, Express, NestJS, TypeScript, JavaScript, Python, Java

Data and Databases: PostgreSQL, MySQL, MongoDB, Neo4j, Elasticsearch, Redis, PySpark

AWS Services: EC2, ECS, EKS, Lambda, S3, CloudFront, ALB, API Gateway, EventBridge, IAM, VPC, RDS

Tools and Platforms: Docker, Kubernetes, Jenkins, Git, Terraform, Twilio, RabbitMQ, WebSockets, OAuth 2.0, Keycloak

AI and Developer Tools: ChatGPT, Claude, Gemini, GitHub Copilot, Codex, prompt engineering, AI-assisted debugging, AI-assisted architecture

Domain Expertise: Real-time systems, payment processing, AML/KYC compliance, high-availability design, scalability, operational excellence, SDLC best practices

EDUCATION

Master of Computer Application (MCA), Cochin University of Science and Technology | Jul 2018 - May 2021 | Kochi, India | CGPA: 7.2

KEY ACHIEVEMENTS

- Architected and operated a distributed eSports platform supporting 1.5M+ users, 20K peak active gamers, and 99.9% uptime.
- Led technical architecture decisions for mission-critical systems handling high-volume transactions, real-time communication, and complex state management.
- Improved performance across multiple systems: Neo4j queries by 70%, Elasticsearch latency by 60%, and API latency by 45%.
- Reduced deployment cycle time by 60% through CI/CD automation and stronger cloud release workflows.
- Mentored engineers through code reviews, design discussions, production readiness practices, and system design knowledge sharing.
- Contributed to Rs. 4500+ crore revenue influence and Rs. 10L/month CRM cost reduction through real-estate platform digitization.
- Demonstrated strong problem-solving across payments, compliance, real-time systems, cloud infrastructure, and large-scale data processing.
